

MANOJ BHATT

PRODUCT DESIGNER | ENTERPRISE & AI/ANALYTICS UX

manojbh476@gmail.com • 8383024262 • Gurugram, Haryana, India • Portfolio: manojbhatt.online

PROFESSIONAL SUMMARY

Product Designer with 3+ years designing enterprise AI, analytics, Web3, and gaming products. Specializes in translating complex workflows and technical systems into clear, scalable product experiences through end-to-end product design, interaction design, and information architecture. Partners with Product and Engineering and mentors junior designers.

PROFESSIONAL EXPERIENCE

UI/UX Designer | TransOrg Analytics

Feb 2026 – Present

Enterprise AI & analytics platform for business users

- Own end-to-end product design across 5+ core workflows and 40+ screens for TransOrg's enterprise AI and analytics platform, translating data-heavy, technically complex processes into clear experiences for non-technical business users.
- Partner directly with Product and Engineering from discovery through implementation, resolving feasibility constraints early and reducing design-development rework by ~20%.
- Lead design reviews and mentor 2 design interns while establishing 30+ reusable interaction patterns and components to improve consistency and scalability across the product.

Product Designer | RegisterKaro

Mar 2025 – Sep 2025

- Redesigned the customer onboarding journey for legal and compliance services, reducing the flow from 7 to 5 steps and cutting onboarding drop-off by ~18% through clearer next actions and removal of redundant steps.
- Restructured the homepage information architecture across 20+ legal and compliance offerings, creating a clearer decision-making experience for startup and SME buyers.
- Built a reusable 40+ component library spanning web and mobile, standardizing UI patterns and reducing repetitive design and development effort by ~25%.

UI/UX Designer | LeagueSpotsCo

Mar 2023 – Mar 2025

Formerly XTZesports; Web3, esports & gaming ecosystems

- Redesigned 20+ core screens and workflows for Trybl, translating complex Web3 mechanics into guided user journeys that made decentralized gaming easier to understand and navigate.
- Designed and shipped the Trybl Telegram Mini App across 3 core experience areas, quests, gameplay, and rewards, consolidating fragmented interactions into a single experience within Telegram.
- Led interface and navigation design for Zone across 5+ game categories, standardizing interaction patterns to maintain a coherent experience across different gaming formats.
- Designed digital product experiences for TBR (Team Blue Rising), an esports organization co-owned by Virat Kohli, translating its brand identity into consistent digital touchpoints for a high-visibility esports audience.

EDUCATION

M.Des, Specialization in UX Design, DIT University, Dehradun, India

Aug 2024 – Present

B.Sc., MDU University, Rohtak, India

Aug 2019 – Jun 2022
